Senior Civil Engineer

\$120,744 - \$146,760 annually DOQ/DOE

Plus excellent City benefits

This critical senior position works closely with the City Engineer in managing and directing some of San Rafael's largest and most complex infrastructure projects; and supervises the Capital Improvement Program's other three engineers and project managers.

The Capital engineering division manages projects ranging from a \$13m overhaul of Marin County's busiest roadway corridor, to the reconstruction of a major stormwater pump station to keep low lying areas of the City dry during winter storms; to the installation of new restroom facilities in City parks.

San Rafael Public Works prioritizes serving and communicating with our community, and the successful Senior Civil Engineer candidate will support and enhance public outreach efforts.

San Rafael is Marin's oldest (est. 1874), most diverse and traversed (by vehicles, transit and non-motorized travel) city. We are looking for an individual who is up for the challenge and reward of improving our unique infrastructure and working with an active citizenry, a dynamic department leadership team and an engaged City Council.

Requirements:

- Bachelor's in Civil Engineering
- Five years of post degree engineering experience (master's degree may substitute for one year)
- Registration as a Civil Engineer in California
- Valid driver's license

**APPLY BY AUGUST 2, 2021
