# SENIOR SYSTEMS ANALYST
## Biweekly Salary - $3,727.91 - $4,786.52

The City of Stockton is seeking a highly skilled and experienced Senior Systems Analyst to join our Information Technology team, with a focus on enterprise applications. This role requires a deep understanding of enterprise application architecture, data integration, and IT best practices.

The ideal candidate will be responsible for analyzing and being fluent in the latest technologies, various AI tools, Power BI, Databricks, Azure, Copilot Studio -Google Cloud Platform (GCP), and Amazon Web Services (AWS), to name a few, with experience in the implementation and optimization of enterprise-grade IT systems.

The Senior Systems Analyst will collaborate closely with developers, City department SME, and IT leadership to ensure our systems support strategic objectives, enhance operational efficiency, and adapt to evolving technological needs. Experience with large-scale enterprise environments, IT Security, and GIS is desirable.

**Incumbents work a 9/80 work schedule Monday through Thursday 7:30 am to 5:30 pm and Fridays 8:00 am to 5:00 pm with alternate Fridays off. Incumbents in this position are included in the Civil Service system and are represented by Stockton City Employee Association (SCEA) - Professional and Technical Bargaining Unit.**.

This role involves analyzing and improving computer systems, coordinating with vendors and technical teams, and ensuring seamless integration across platforms. Responsibilities include troubleshooting complex hardware and software issues, enforcing server security policies, optimizing system performance, and maintaining clear communication with user departments. The ideal candidate will have experience in systems analysis, implementation, and documentation, along with a strong understanding of interdepartmental IT needs in a dynamic government environment.
